// CAREER OBJECTIVES

- o Looking for a professional and friendly environment where I can maximize my contribution with the software development experience I have learned, not only about building product, but build the team to build product, with the same passion, motivation and culture.
- o I would like the opportunity to work directly with customer, so I can provide solution for software development and increase quality of outcome.
- o Interesting in Machine Learning, Artificial intelligence and blockchain. I am glad to have opportunity to work and apply them.
- o A leadership position is preferred, but a technical position (Front End or Back End) where I can gain a deep understanding of technology and system design is also great.

// WORK EXPERIENCE

Techcom Securities

Dec 2017 - Present
