Main interests: PHP, HTML5

1.What skills, work projects or achievements make you a strong candidate for this position?

2.When will you be able to join a company?

I have 1 year experience as a PHP programmer, I am a freelancer now, I have done some demo projects with Nodejs and I think I want to be a fullstack developer, especially master Javascript. I think that I will have enough knowledge to catch up with the position that the company is recruiting.
