SUMMARY

From 2009 to present, I have worked in Japan software companies. I have worked in many different projects with many different platforms. As the result, I have learnt and accumulated good experience about programming language, software development procedure, communication skill in Japanese, progress reporting skill as well as management skill in dividing work among team members. Moreover, I have ability in researching and seizing new technology.

My career goal is to become Bridge System Engineer. I am willing to work in Japan for long time.
